Limpopo Jewellery Business Incubator, established in 2009, is more than just a jewellery design and manufacturing hub – it is a platform for growth, creativity and empowerment.

Based in Limpopo, LJBI nurtures talent through its learnership programme, where aspiring jewellers are taught to create unique pieces from scratch, transforming raw materials into works of art. Beyond training, LJBI drives economic development by supporting SMMEs in the jewellery sector, helping them refine their craft, grow sustainable businesses, and access markets. We proudly manufacture a wide range of jewellery pieces – from rings, earrings, bracelets and neck-pieces to bangles – using both precious and semi-precious metals and stones, blending tradition with innovation to create timeless designs.
